

REGISTRATION, ACCOUNTABILITY AND SECURITY OF WEAPONS, GEAR AND AMMO

MILITARY WEAPONS MANAGEMENT SYSTEM

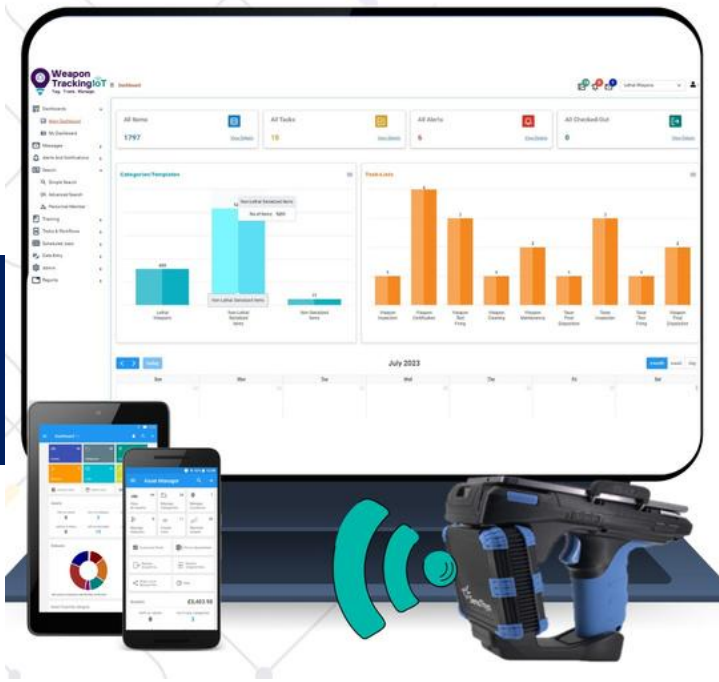

Proven armory and warehouse weapons management

COMMAND CENTER SOFTWARE

IoTWeaponTracker is your command center for managing weapons, gear, magazines, cases, cartons, boxes, tools, parts and personnel.

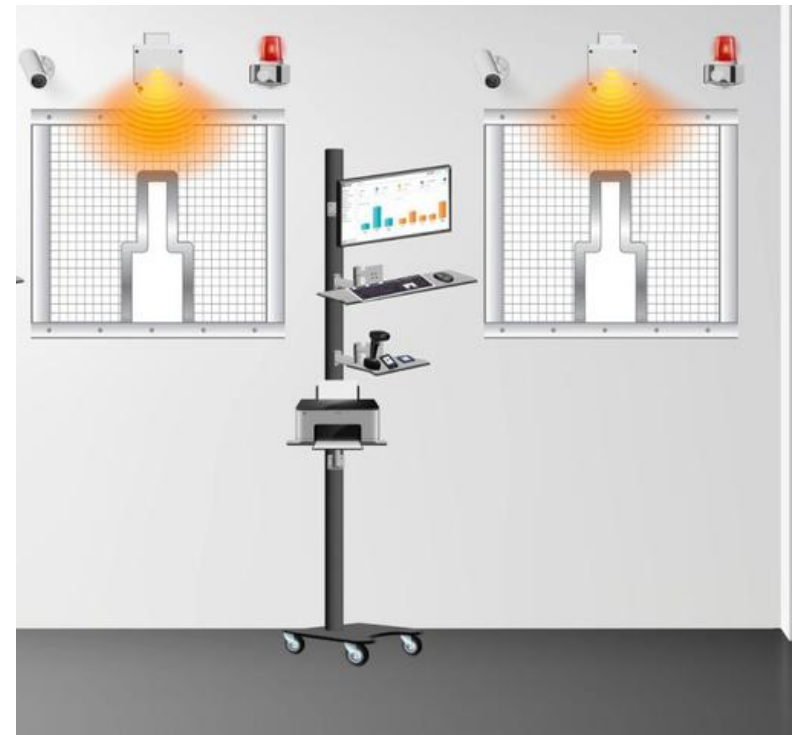

- Digitizes armory and warehouse management.
- Software is fully developed and is configured for each customer's exacting data, workflow, tracking, security and reporting requirements.
- Armory management functions can be performed using computers, tablets, smart phones and mobile scanners. IoTWeaponTracker can also transmit alerts to external devices, such as vehicle tablets or personnel phones.
- IoTWeaponTracker supports barcoding and RFID tracking of serialized items, such as weapons or vests, and increment-decrement (quantity) of non-serialized items, such as boxes of ammo or OC spray.

ISSUES AND RETURNS

IoTWeaponTracker provides locked-down accountability of shift-turnover Issues and Returns, including:

- Personnel authentication using ID card, Fingerprint or PIN #, with verification that the soldier's ID card / active duty status is current.
- Displays data and photos of assigned and post-required items.
- Displays and verifies that weapon certifications are current and up-to-date, with on-screen alerts if certification(s) have expired.
- Displays and verifies that soldier's status as 'OK to ARM' or 'Do not ARM'.
- Validates transfer-of-custody from armory to soldier by capturing soldier's electronic signature, PIN # or fingerprint.
- Generate unlimited forms and reports related to armory functions, data and compliance with standard operating procedures
- Detailed audit trail historical records of all armory activities.

INVENTORIES AND MOBILE COMPUTING

- Mobile computing automates and streamlines armory and warehouse tasks, and ensures data integrity of physical weapons, gear and ammo counts.
- Supports mobile scanners, tablets and phones utilizing RFID, barcoding and Bluetooth.
- Supports the management of both serialized objects, like weapons, and, non-serialized items, like boxes of ammo.
- Rapid inventories of all items all-at-once at distances up to 10', including audits that detail:
 - Expected and located
 - Expected and not located
 - Unexpected and located
- Scan shelf barcodes for non-serialized item types for increment/decrement to keep track of current inventory quantities.

ARMORY MANAGEMENT

IoTWeaponTracker monitors and keeps track of armory tasks, including:

- Officer ID update
- Weapon certification update
- Weapon cleaning
- Weapon inspection
- Weapon test firing
- Maintenance

- 01 Task due dates and time intervals are monitored, such as 'Due in 30 Days', automatically triggering alerts, messages and calendar updates.
- 02 IoTWeaponTracker also supports advanced workflows where groups of Users contribute to a task and approvals are captured, with all data saved to audit trail records.

EXPERIENCE YOU CAN COUNT ON

- The most proven indicator of future success is prior performance.
- IoTWeaponTracker weapons management experience dates to 2007 with digitization of the U.S. Department of State's global weapon, gear and ammo system.
- IoTWeaponTracker has been further optimized and continually improved based on inputs from global military, police and security organizations.
- When you want the best, choose IoTWeaponTracker .
